ACTIVITY.
TYC LA MATA, S.L.U is a company created on June 15th 2006, dedicated to the carriage of Goods by Road, while acting as Transport Operator and making all kind of Construction Works (Civil and Building), offering Services in a public and private sector (Maintenance Contracts, Conservation, Gardening, Kitchen, Laundry and Cleaning) and the Purchase and Sale of Coals and Derivates, in general imports and exports of all kind of Solid Fuels.

From the beginning TYC LA MATA, S.L.U, has provided services to prestigious companies in Transport and Construction and in the market of solid fuels which can be seen in the list of activities that TYC LA MATA, S.L.U has developed and is detailed below.

Its tx registered office is based in Grado (Asturias–Spain) in Avenida Fernando Villabella Nº48, Lower Left, C.P. 33820. We have warehouse for Building Materials and Machinery Park in Entre La Iglesia s/n, 33.825 La Mata – Grado. We own a warehouse in Solís – Corvera to store the coal and rented one at Avilés Port.

Its capital is of Spanish origin, of a private nature, and is not in any percentage owned by any other company.

The company works nationwide in the transport, coal and derivatives sector and at a regional level for the building construction activity.

Products or Services

TYC LA MATA S.L.U. Import and Sale Company, began its activity in 2009, it is primarily dedicated to the management of Coals and derivatives. Its infrastructure and skilled human resources, own logistics (machinery, transport and industrial processing machining), are based in Avilés Port and Musel - Gijón Port, both located on the north coast of the Iberian Peninsula. Employers are highly qualified and actively involved in supporting the tasks of imports of bulk commodities, mobilizing large volumes of material annually, and according to Companies with large capacity.

We have a temporary storage area used for all kind of bulk solids mainly coal at Avilés Port and a warehouse in property in...
Solís-Corvera. It is a 10,000 m² area. These facilities have the infrastructure, equipment and qualified staff for weighing, sieving (screening) the selection of the mineral (anthracite).

TYC LA MATA S.L.U, has mobile screen to manage the coal, hoppers and conveyor system, which select the product, perform the collection and prepare it for distribution.

The product is transferred by an excavator charge and a different types of loader machiner (frontal loader). Coals Park is equipped with a cleaning system and high pressure wash, which removes the possibility of contamination in handling different types of coals.

TYC LA MATA S.L.U, has specialized personnel and equipment clearance activities, truck weighing systems and connections to major road networks, which optimize the activities of transporting the product to its final destination.

Each day, TYC LA MATA S.L.U grows strongly nationwide as a Company specializes in handling bulk cargo and providing our customers with:

- Quality service, efficiency and specialization.
- A successful and sustainable profitability, within a framework of ethics and safety.
- A comprehensive development of our activities, responsibly taking care of the environment.

TYC LA MATA S.L.U offers a SERVICE to loads THROUGH OUR LOGISTICS AND DISTRIBUTION AREA, STORING AND DISTRIBUTING PRODUCTS as CUSTOMER REQUIREs.
